

CloudHub® ACS

An Access Control System (ACS) is a critical component of a comprehensive safety strategy. ACS can contribute to business objectives like overall facility safety, compliance, increased revenue, optimized traffic flow, key consolidation, and overall simplification. Despite these significant contributions, organizations traditionally rely on their already overburdened staff to juggle multiple, disparate vendors to implement this solution. Additionally, ACS may or may not fit cohesively with the organization's overall safety strategy. **What if there was a way to integrate access control that allowed for effective business solutions with a consumption-based model? Introducing DGI's CloudHub® ACS.**

1 We Learn Your Business

CloudHub® ACS solutions are tailored to your business needs and the goals you aim to achieve – even goals that may seem outside the traditional expectations of access control.

2 We Take Ownership

DGI designs, installs, and *owns* your solution, period. No questions, no finger-pointing, no confusion. You'll have one vendor managing a scalable system with established contingency and sustainability plans.

3 Best-in-Class Solutions

We've selected best-in-class hardware and technologies to deliver the best possible solution, one that is uniquely qualified for any contingency and compliant with current access control regulations.

More Advantages:

- Consumption model
 - We take the risk of the major capital expenditure
 - You pay per door, per month
- Consultative approach begins with organizational outcomes
- Assessments, implementation, and contingency plans are included with every installation
- Owned and managed by a single party
- Hardware is patchable, and upgrades are on us
- Seamless integration with other security systems
- We work hard to re-earn your business every month
- Reduced burden on internal staff
- Useful for energy management efforts
- Available through GSA and CMAS purchasing contracts

CloudHub® ACS will deliver a cohesive strategy based on your desired outcomes. Go to **www.dgi.rocks** or call us at **(530) 229-0071** to build a better access control strategy today!
