

CloudHub® Internet

Why on earth would you connect to The Cloud through the Internet? With DGI's CloudHub® Internet, access a redundant, enterprise-class network that guarantees an improved experience with your cloud-based applications.

Three reasons for CloudHub® Internet:

1. You're Not Competing with the Internet

A connection to CloudHub® Internet provides access to an enterprise-class, redundant network from multiple Internet providers.

2. Private Connection

Guaranteed private connection with end-to-end QoS, plus direct connections to major application and content providers like AWS mean you're only a few hops away from the services you use the most.

3. Best Internet Connection

CloudHub® Internet is configured to leverage its connections to automatically choose the best route for each request. Traffic is monitored and evaluated to optimize application consumption and maintain the overall customer experience.

Benefits of CloudHub® Internet:

- Virtual Firewall available through the platform
 - Protect your network at a fraction of the expense
 - Minimize the complexities of purchasing an additional, on-prem Firewall
- Direct connection to major application services
- Multiple Internet connections to ensure best choice for commodity Internet traffic
- Redundant, enterprise-class connection to guarantee an improved experience
- Reduced number of "hops" required to get from your network to mission-critical cloud-based applications
- CloudHub® includes managed and consulting services
- Eliminate the need to manage the complexity of multiple vendors
- Available through GSA and CMAS purchasing contracts

Why on earth would you connect to The Cloud through the Internet? You shouldn't. Discover a better way. Visit us at www.dgi.rocks or call **(530) 229-0071** to get started today.
